

## Teaching material for High Schools

Erstatningsforretning i København

## Objective

To raise awareness of the alcohol culture among pupils.

## Description

Web based teaching material for High Schools. The material is aimed for use during lectures in Biology, Psychology, Danish and Social Science. For example the Biology section includes an explanation on the effect that alcohol has on the body and on the brain, the Danish section includes information on the Danish party culture, and the Psychology section includes what happens to people's behaviour after they've drunk alcohol.

## Results

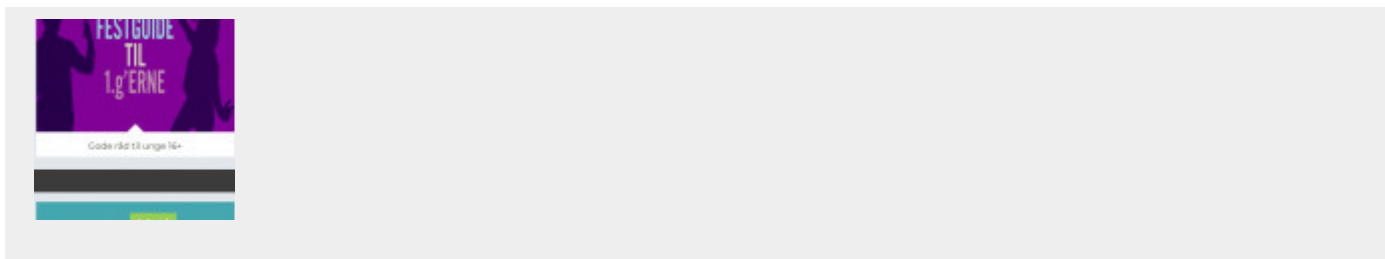

PR material and posters were mailed to all High Schools (166) and to all headmasters (154). PR material was presented at a conference for advisory staff was recommended on the webpage for preventive workers at the municipalities.
